

Metagenics Medical Food Advantages

Safer Approach

Metagenics medical foods contain only ingredients derived from food and plants. To date, no serious adverse events have been reported that are associated with the use of Metagenics medical foods.

History of Use

Metagenics is a pioneer in developing medical foods since the early 1990s.

Laboratory & Clinical Research

Our medical foods are backed by years of laboratory, clinical, and literature research. The Functional Medicine Research Center® at Metagenics conducts individual case studies and clinical studies to develop and refine medical food formulations.

Taste & Variety

All of our medical foods are naturally flavored, and many are available in a range of delicious flavors.

Comprehensive Programs

Metagenics medical foods are accompanied by clinically tested dietary recommendations to enhance program success. User-friendly program guides may also include complementary suggestions for exercise and stress management to help deliver better outcomes.

The Metagenics Medical Food Difference

Metagenics offers research-based medical foods made to the highest quality standards to provide exceptional support for better health. Available from respected healthcare providers.

A Safer Approach to Managing Chronic Illness

 **Metagenics**®

Genetic Potential Through Nutrition

What is a Medical Food?

Medical foods are scientifically formulated from extracted or combined food components (including macro- and micronutrients and phytonutrients)

to nutritionally support the management of a specific disease or condition, and are to be used under the supervision of a physician or other licensed healthcare practitioner.

Medical foods contain nutrients in therapeutic amounts that typically cannot be obtained through an ordinary diet.

Medical Foods for Chronic Health Conditions

Scientifically Formulated. Clinically Tested.
